

# Full Volume Test for Indian Point Sirens set for Wednesday, March 15, 2023, at 10:30 AM

There will be a full-volume test of the Indian Point siren system in Westchester, Rockland, Orange and Putnam counties on **Wednesday, March 15th, at approximately 10:30 AM.**

During the test the sirens will sound for four minutes. WHUD Radio (100.7 FM) will test the Emergency Alert System immediately following the siren test.

**NO RESPONSE ON THE PART OF THE PUBLIC IS NECESSARY DURING THESE TESTS.**

County officials will use the siren system to alert the public during an emergency at Indian Point. In an actual emergency, all the sirens would sound at full volume for four minutes. **Sirens are not a signal to evacuate; but to alert the public to tune to their local Emergency Alert System (EAS) radio or TV station for important information.** The EAS stations are listed in the booklet *“Are you Ready? Putnam County Indian Point: Emergency Guide,”* which was distributed, as well as available online.
